

SPECIFICATION SHEET

Product Group: **Shade & Shelter**

PRODUCT NAME: AMALFI

Product Code: CARAAMALFI

Product Description

The Amalfi canopy floats freely, seemingly weightless. The pole of the parasol stands laterally, thus creating plenty of space for tables and chairs. While the sun may wander during the day, the shade remains exactly where it is needed. With the optional stainless steel rotary foot, the Amalfi can be rotated 360° without having to move the base.

- Robust aluminium frame for high wind stability
- Smooth integrated crank winch
- Mast for wall installation available
- Optional with stainless steel rotary base
- Optionally available with two or four canopies

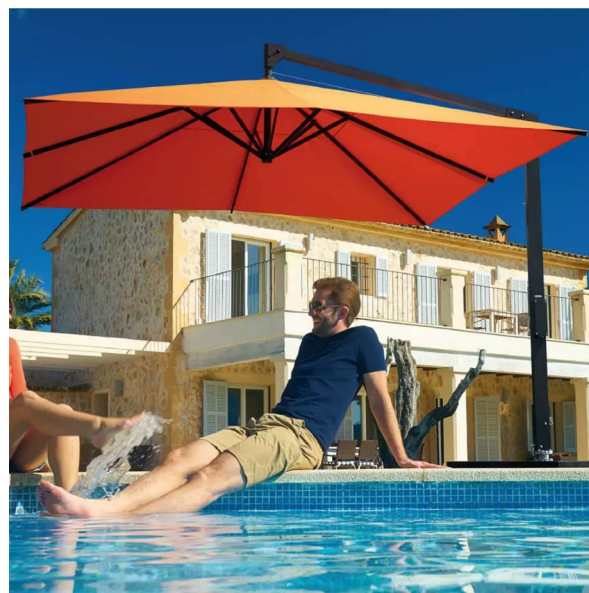

Levelling Parasol Head : With the levelling function, the canopy can be adjusted horizontally by a few degrees in the direction of the mast. The mechanism is suitable for adjusting the canopy, but not for inclining it

Smooth Crank Winch : Amalfi opens and closes very easily with the smooth crank winch. Self-locking holds the parasol in any position

Space Saving Wall Installation : Save space by mounting the Amalfi to walls. The High-Power mast with a diameter of 60 mm and a wall thickness of 4 mm is produced for you according to your exact requirements, such as the wall installation height, the desired crank height etc. After closing the parasol, the Amalfi can be turned to the side to save space

Features

Operation :	Self-stopping winch with detachable crank
Fabric :	Premium acrylic awning fabric in more than 120 colours. Also optionally available with water-permeable or fire proof fabrics
Composition :	200 RAL colours for masts and struts
Mast :	High-Power mast – 60 x 100 mm and 4 mm wall thickness – triple welded
