

# SPECIFICATION SHEET

Product Group: **Shade & Shelter**

**PRODUCT NAME: GRANDE**

**Product Code: CARAGRANDE**

## Product Description

Big, bigger, Grande. When standard parasols are no longer enough, the robust central pole parasol scores points with its large spans. In the food service industry, the shading system with an area of up to almost 80 m<sup>2</sup> offers a pleasant atmosphere for a large number of guests.

**High stability** : Parasol Grande is equipped with a particularly strong and solid aluminium rim. Powder coating in RAL colour of your choice is possible

**Super easy to use** : Samara can be opened and closed via a removable stainless steel crank. The mechanism inside the mast ensures that the umbrella can be closed very easily with minimal effort

**Power Struts** : The parasol struts made of strong 60 x 30mm aluminium with additional U-reinforcements provide wind stability even at high spans

**Sophisticated Telescopic Design** : The telescopic system extends the pole when closing! Tables and patio furniture can simply stay where they are

**Square**— Available from 6.5m to 8m

**Rectangular**— Available from 4m x 8m to 6m x 8m

**Octagonal**— Available from 7.5m to 10m
