

SPECIFICATION SHEET

Product Group: **Shade & Shelter**

PRODUCT NAME: SUPREMO

Product Code: CARASUPREMO

Product Description

It's so easy – with its sophisticated sliding mechanism, the Supremo opens and closes much more easily and quickly than other parasols, even for large spans. This means Supremo is a welcome addition not only to private gardens and restaurants, but is also suitable for pre-schools and public institutions.

Easy Lift Balance System : Supremo has a particularly innovative sliding mechanism: With the tap of a finger on the locking switch, the parasol automatically unfolds halfway using its own weight. All that's left to do is lightly push the handle upward and lock it. This system allows for quick and easy handling, even with large parasols

Struts With Double Support : The double strut hub provides double support for the main struts, to which the fabric is attached. An interior aluminium profile provides additional strut support for large parasols. This makes the parasol especially robust and wind-stable

Stainless Steel Handle With Locking Switch : Quality in all parts – the stainless steel handle of the Supremo is practical as well as especially stable! When opening and closing the parasol, its locking switch snaps into place automatically

Sophisticated Telescopic Design : The advantage: the telescopic system extends the mast when closing! Tables and patio furniture can stay where they are

Features

Operation :	Easy-Lift-Balance system
Fabric :	Premium acrylic awning fabric in more than 120 colours. Also optionally available with water-permeable or fireproof fabrics
Frame :	White RAL 9016, anthracite grey RAL 7016 or anodised silver, other RAL colours at extra charge
Mast :	Aluminium mast with 50 mm diameter and 3 mm wall thickness
Struts :	Double-Layer power struts 30 x 15 x 2 mm with strut reinforcement

Square— Available from 3m to 5m
