

SPECIFICATION SHEET

Product Group: **Café Barrier Systems**

PRODUCT NAME: **CROSS BEAMS**

Product Code: **BLCB**

- **Supplied in pairs**, all cross-beams come **complete with** our extreme, **Heavy Duty beam ends**.
- Our UK-made, **standard** café barrier cross beams are the **strongest on the market**.
- For more challenging environments we offer **2 upgrades**. **Premium**: Twice the standard thickness. **Premium Plus**: Premium with added central core strengthener.
- Our **Heavy Duty beam ends** are manufactured in corrosion resistant **zinc plated steel**, and the tube is manufactured in aluminium.
- **Turned from a single piece metal bar** for strength our Heavy Duty beam ends are stronger than the much weaker cast beam ends that many competitors provide.
- Our café barrier cross beams incorporate a **patented trigger mechanism** which avoids accidental release.
- **Non-standard length** cross-beams available.
- Beam-ends can be colour coded to **over 200 RAL colour choices**.
- Highly recyclable, non-combustible, non-toxic

Technical Data

Standard

- Aluminium Tube
- **SWG** : 16
- **Thickness** : 1.62mm
- **Diameter** : 25.4mm
- **Weight** : 0.33kg/mtr
- **Finish** : Anodised

Premium

- Aluminium Tube
- **SWG** : 10
- **Thickness** : 3.25mm
- **Diameter** : 25.4mm
- **Weight** : 0.612kg/mtr
- **Finish** : Anodised

Premium Plus (Premium as above)

- Round Aluminium Core Bar
- **Diameter** : 15.88mm
- **Weight** : 15.88kg/mtr
- **Finish** : Anodised
